Roles to be posted on 28th July

Role 1

Information Security Officer (CISO)

What We're Looking For

We're seeking a seasoned cybersecurity leader with **12–18 years of experience** in Information Security or Cybersecurity and a proven track record of leading enterprise security programmes. You bring expertise in **ISO 27001, ISO 27701, cloud security, DevSecOps, security operations, and cyber risk management**, with a strong understanding of frameworks such as **NIST** and **ISO 27001**. You're a strategic leader who can influence senior stakeholders, build high-performing teams, and foster a resilient, security-first culture. **CISSP, CISM, or ISO 27001 Lead Implementer/Auditor** certifications are preferred.

What You'll Do

You'll define and lead ONDC's enterprise cybersecurity strategy, building a secure, resilient, and trusted technology ecosystem. You'll drive security architecture across cloud, applications, APIs, and infrastructure while leading cyber risk management, security operations, and incident response. You'll own ISO 27001 certification, security governance, and regulatory compliance, embed security by design across products and engineering, strengthen organisational cyber resilience through proactive risk management and audits, and serve as a trusted advisor to leadership on cybersecurity strategy, emerging threats, and enterprise risk.

Why ONDC?

Lead cybersecurity for one of India's most significant Digital Public Infrastructure initiatives, shaping secure and resilient digital commerce at national scale. Work alongside senior technology leaders, solve complex cybersecurity challenges with real public impact, and be part of a mission-driven organisation building the future of digital commerce.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role- 2

Product Lead / Principal Product Manager – Logistics / Travel & Tourism / Financial Services

What We're Looking For

We're seeking an accomplished **Product Leader** with **8–15 years of experience** in Product Management and a proven track record of building and scaling complex platform, marketplace, API-driven, or network-based products. You bring deep expertise in product strategy, roadmap development, platform thinking, customer-centric innovation, and data-driven decision-making, with the ability to translate complex ecosystem challenges into scalable product solutions.

Experience in **Logistics, Travel & Tourism, Financial Services, Digital Commerce, or Digital Public Infrastructure** is highly preferred. You have a strong understanding of APIs, platform architectures, and interoperability, and are comfortable working at the intersection of technology, business, and policy. You're an influential product leader who can partner effectively with Engineering, Design, Business, and senior leadership, drive cross-functional alignment, mentor Product Managers, and thrive in fast-paced, ambiguous environments.

What You'll Do

You'll define and drive the product vision, strategy, and roadmap for one or more strategic domains across the ONDC Network, building platform capabilities that accelerate ecosystem adoption, interoperability, and network growth. You'll own the evolution of open APIs, network specifications, and digital products, partnering closely with Engineering, Architecture, Policy, and Business teams to deliver scalable, secure, and future-ready solutions.

You'll work closely with Network Participants, industry partners, and ecosystem stakeholders to understand market needs, identify product opportunities, and shape category-defining experiences that strengthen network health and adoption. You'll leverage customer insights, experimentation, and data to prioritise investments, define product success metrics, and continuously improve platform performance.

As a senior product leader, you'll influence organisation-wide product decisions, present strategy and roadmap recommendations to leadership, mentor Product Managers, establish product management best practices, and champion a culture of innovation, customer obsession, operational excellence, and continuous learning.

Why ONDC?

Shape the future of one of India's most transformative Digital Public Infrastructure initiatives by building products that power an open, interoperable digital commerce ecosystem. Work alongside exceptional technology and business leaders, solve complex platform challenges at national scale, and create products that deliver meaningful impact for businesses, consumers, and the broader digital economy.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role-3

Senior Vice President – Product (Product Head)

Location: New Delhi, India
Employment Type: Full-time
Work Mode: In Office

What We're Looking For

We're seeking a visionary **Senior Vice President – Product** with **18+ years of experience** in product leadership, platform strategy, digital commerce, marketplaces, or technology ecosystems. You have a proven track record of building and scaling complex products, leading high-performing product teams, and driving business and ecosystem impact.

You bring deep expertise in **platform products, APIs, open networks, interoperability, and ecosystem-led growth**, with experience across **Logistics, Travel & Tourism, Financial Services/FinTech, Retail, or Digital Commerce**. You are a strategic leader who can influence senior stakeholders, drive innovation, and build products at national scale.

What You'll Do

You'll own ONDC's **product vision, strategy, and roadmap**, shaping the future of India's open digital commerce ecosystem. You'll lead the development of scalable platform capabilities, open network specifications, and API-driven solutions in partnership with Engineering, Technology, Policy, Business, and ecosystem stakeholders.

You'll drive adoption and network growth by building strategic partnerships, identifying market opportunities, and translating ecosystem needs into impactful product strategies. You'll build and mentor a world-class product organisation, establish product excellence, and serve as a key advisor to leadership on product direction and innovation.

Why ONDC?

Lead product strategy for one of India's most transformative Digital Public Infrastructure initiatives. Build open, interoperable digital commerce platforms that empower millions of businesses and consumers, while solving complex challenges with national-scale impact.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role-4

Data Architect

What We're Looking For

We're seeking a Data Architect with 8 to 12 years of experience in data architecture, platform engineering, or distributed systems, with expertise in building and scaling large-scale data platforms.

You bring strong experience in data lakehouse architecture, cloud platforms, streaming systems, data governance, analytics platforms, and distributed data processing. Hands-on expertise with technologies such as Spark, Kafka, Snowflake, SQL, cloud-native architectures, and modern data frameworks is preferred.

You are a hands-on architect who can design scalable data solutions, optimise performance and cost, and collaborate across engineering, product, and business teams to build future-ready data infrastructure.

What You'll Do

You'll design and evolve ONDC's data platform architecture, enabling scalable analytics, real-time processing, and trusted data access across the open commerce ecosystem.

You'll build and optimise data pipelines, lakehouse architectures, streaming platforms, schema governance, and analytical systems while driving best practices in reliability, performance, security, and cost optimisation.

You'll partner with engineering and technology leaders to build data capabilities that support ONDC's mission of creating scalable, interoperable digital infrastructure.

Why ONDC?

Build the data foundation of one of India's most transformative Digital Public Infrastructure initiatives. Work on internet-scale systems, solve complex data challenges, and innovate at the intersection of data engineering, AI, and open networks.

Location: ONDC Headquarters, Delhi (Work From Office)

Role-5

AI Architect – Intelligent Systems

What We're Looking For

We're seeking an AI Architect with 8–12 years of experience in AI engineering, software architecture, and distributed systems, with a proven track record of designing scalable intelligent platforms.

You bring deep expertise in LLMs, Small Language Models (SLMs), agentic systems, knowledge architectures, AI infrastructure, model optimisation, and production-scale AI systems. You have experience designing architectures that balance scalability, performance, reliability, privacy, and cost.

You are a hands-on technology leader who can define AI architecture strategy, guide engineering teams, and build next-generation intelligence systems that enable real-world commerce applications.

What You'll Do

You'll architect ONDC's next generation of AI-powered commerce intelligence platforms, designing scalable solutions across agentic systems, multilingual AI, knowledge platforms, and intelligent automation.

You'll define AI system architectures covering model pipelines, fine-tuning frameworks, inference platforms, knowledge systems, agent orchestration, and distributed AI infrastructure. You'll work closely with the CTO, AI leadership, and engineering teams to translate business and ecosystem needs into scalable technology solutions.

You'll establish AI engineering best practices, evaluate emerging technologies, guide technical decisions, and ensure ONDC's AI platforms are secure, reliable, cost-efficient, and ready for India-scale adoption.

Why ONDC?

Shape the future of AI-powered Digital Public Infrastructure by building intelligent systems for India's open commerce ecosystem. Work on cutting-edge AI, agentic platforms, and large-scale technology challenges that create meaningful impact for millions of businesses and consumers.

Location: ONDC Headquarters, Delhi (Work From Office)

Role-6

Engineering Manager – Platform

What We're Looking For

We're seeking an **Engineering Manager – Platform** with **8+ years of experience** in software engineering, distributed systems, and platform development, including hands-on coding and team leadership.

You have experience building and scaling **platform services, shared infrastructure, APIs, and distributed systems** used across multiple teams. You are a hands-on engineering leader with strong technical depth, platform thinking, and the ability to build high-performing teams.

What You'll Do

You'll own the engineering of ONDC's core platform foundations, building scalable, reliable, and reusable services that power India's open commerce ecosystem.

You'll drive platform architecture, engineering standards, and build-vs-reuse decisions while partnering with Architects and Engineering Leadership. You'll stay hands-on with design, coding, reviews, and problem-solving while mentoring engineers and improving delivery excellence.

You'll champion modern engineering practices, including **AI-assisted development**, and help teams build reliable, high-performance systems at national scale.

What You Bring

- 8+ years of software engineering experience with leadership/mentoring experience.
- Strong expertise in distributed systems, APIs, backend platforms, and cloud-native architectures.
- Experience building reusable platform services and large-scale engineering systems.
- Knowledge of event-driven systems, streaming, and data platforms.
- Strong ownership, problem-solving, and engineering excellence mindset.

Why ONDC?

Build the technology foundation powering India's open digital commerce ecosystem. Solve large-scale distributed systems challenges, drive AI-enabled engineering practices, and create platforms with nationwide impact.

Location: Delhi (Work From Office)

Role-7

Engineering Manager – Application

What We're Looking For

We're seeking an Engineering Manager – Application with 8+ years of experience in software engineering, application development, and team leadership.

You have experience building and scaling web applications, APIs, SDKs, and developer platforms with strong expertise in frontend, backend, microservices, and cloud-native technologies. You are a hands-on engineering leader who can mentor teams, drive execution, and deliver high-quality products at scale.

What You'll Do

You'll lead engineering teams building ONDC applications, SDKs, and developer tools that enable India's open digital commerce ecosystem.

You'll drive product delivery, engineering excellence, code quality, and scalable architecture while partnering with Architects and Engineering Leadership. You'll mentor engineers, improve development practices, and champion AI-assisted engineering to accelerate innovation and productivity.

What You Bring

- 8+ years of software engineering experience with team leadership experience.
- Strong experience building scalable applications, APIs, and SDKs.
- Expertise in frontend/backend systems, microservices, cloud platforms, and CI/CD.
- Strong ownership, problem-solving, and collaboration skills.

Why ONDC?

Build applications and developer platforms powering India's open digital commerce ecosystem. Solve meaningful engineering challenges at national scale and create technology that impacts millions of businesses and consumers.

Location: ONDC Headquarters, Delhi (Work From Office)

END of POST—----------

Data Protection Officer (DPO)

What We're Looking For

We're seeking an experienced privacy leader with 10–14 years of experience in Data Protection, Privacy, Information Governance, or Regulatory Compliance and a proven track record of leading enterprise privacy programmes. You bring deep expertise in the Digital Personal Data Protection (DPDP) Act, 2023, privacy governance, Data Protection Impact Assessments (DPIAs), regulatory compliance, incident management, and privacy risk management. You're a strategic leader who can partner across Technology, Product, Legal, and Business teams, influence senior stakeholders, and translate regulatory requirements into practical business outcomes. Professional certifications such as CIPP, CIPM, CIPT, or equivalent are preferred.

What You'll Do

You'll lead ONDC's enterprise-wide privacy and data protection function, serving as the designated Data Protection Officer under the DPDP Act, 2023. You'll define and strengthen privacy governance frameworks, policies, and controls, embed privacy by design across products and technology, lead DPIAs, privacy audits, breach response, and regulatory engagement, while ensuring compliance with evolving data protection regulations. You'll also work closely with cross-functional teams to foster a privacy-first culture and build trusted, responsible data practices across the organisati**on.**

Why ONDC?

Lead privacy and data protection for one of India's most significant Digital Public Infrastructure initiatives, shaping trusted digital commerce at national scale. Work alongside senior technology leaders, solve complex privacy and regulatory challenges with real public impact, and be part of a mission-driven organisation building the future of digital commerce.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role 1

SVP – Ecommerce, Retail & B2B Growth

What We're Looking For

We're seeking a seasoned business leader with 16+ years of experience in Ecommerce, Retail, B2B Commerce, Marketplace Growth, or Platform Businesses. You have successfully owned business growth or P&L responsibilities, scaled marketplace ecosystems, and built strategic partnerships across multiple commerce categories. You bring strong commercial acumen, the ability to influence senior stakeholders, and experience leading high-performing teams while driving cross-functional execution. Exposure to open digital ecosystems, network-based business models, government or industry collaborations, and inclusive commerce initiatives (MSMEs, FPOs, artisan ecosystems) will be highly valued.

What You'll Do

You'll lead the business strategy and growth agenda for Ecommerce, Retail, B2B, and Impact Retail on the ONDC Network. You'll drive onboarding, activation, and long-term success of Buyer and Seller Network Participants, define category-specific go-to-market strategies, and build strategic partnerships that increase transaction volumes and ecosystem adoption. Working closely with Product, Technology, Policy, and Operations teams, you'll remove adoption barriers, strengthen network health, monitor business performance, and represent ONDC with industry leaders, government bodies, and ecosystem partners while mentoring a high-performing category team.

Why ONDC?

Lead one of India's most transformative Digital Public Infrastructure initiatives and shape the future of open digital commerce. Drive growth across multiple high-impact commerce categories, collaborate with industry leaders and policymakers, and build an inclusive, interoperable ecosystem that empowers businesses of every size while redefining how commerce operates at population scale.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role 2

Lead – D2C Demand & Partner Growth

What We're Looking For

We're seeking a strategic, data-driven growth hacker with 9+ years of experience in D2C Growth, E-commerce, Marketplace Growth, Category Management, or Commercial Strategy. You have a proven track record of scaling digital businesses, managing strategic partnerships, and driving commercial outcomes through customer acquisition, conversion optimisation, and performance marketing. You bring strong analytical capabilities, expertise in marketplace ecosystems, and the ability to influence senior stakeholders while leading cross-functional initiatives in fast-paced, high-growth environments. Experience with ONDC, digital marketplaces, or large-scale commerce ecosystems, along with hands-on knowledge of GA4, SQL, Power BI, Tableau, or similar analytics tools, is highly preferred.

What You'll Do

You'll own the growth strategy and commercial performance of Buyer Network Participants (BNPs), driving demand, revenue, and customer acquisition across ONDC's digital commerce ecosystem. You'll build strategic partnerships, optimise end-to-end customer journeys, lead data-driven growth initiatives, and strengthen merchandising and marketplace performance. Working closely with Product, Technology, Marketing, and Operations teams, you'll unlock scalable growth opportunities, improve conversion and retention, and deliver measurable business outcomes through data, experimentation, and ecosystem collaboration.

Why ONDC?

Shape the future of digital commerce by driving growth for one of India's most significant Digital Public Infrastructure initiatives. Partner with leading ecosystem players, solve complex commerce challenges at scale, and build innovative growth strategies that create meaningful impact for millions of businesses and consumers across India.

Location: ONDC Headquarters, South Delhi (Work From Office)

Role 3

Manager – Strategic Communications Supporting the CEO's Office

What We're Looking For
We're looking for a strong storyteller and strategic communicator with 6–10 years of experience in executive communications, corporate communications, consulting, public policy, or Chief of Staff roles. You have a proven ability to transform complex ideas into compelling narratives. You're comfortable working with senior stakeholders, managing high-visibility assignments, and thriving in fast-paced, ambiguous environments. Exceptional writing, stakeholder management, and sound judgment in handling confidential information are essential. Experience working with government, public policy, Digital Public Infrastructure (DPI), or technology-led organisations will be an advantage.

What You'll Do
You'll partner closely with the CEO's Office and senior leadership to craft strategic communications for internal and external engagements. You'll drive thought leadership and influence perception and decision-making at the highest levels. You'll translate complex cross-functional inputs into clear, compelling narratives, support leadership during government and stakeholder interactions, and ensure consistency across executive communications. Working across Product, Policy, Technology, and Business teams, you'll enable informed decision-making and strengthen ONDC's leadership communication and thought leadership.

Why ONDC?
Shape the narrative of one of India's most significant Digital Public Infrastructure initiatives. Work alongside senior leadership, contribute to high-impact government and industry engagements, and help communicate the vision transforming the future of digital commerce in India.
Location: ONDC Headquarters, South Delhi (Work From Office)

Role 4

Category Manager – Cross-Border & Export

What We're Looking For

We're seeking a category leader with 10+ years of experience in Cross-Border Ecommerce, Export/Import Category Management, or Global Marketplace Growth. You have successfully owned category P&L or business growth charters, scaled exporter and logistics partner ecosystems, and built cross-border supply chains spanning sourcing, freight, and trade compliance. You bring strong commercial acumen and hands-on execution capability across multi-region GTM. Exposure to network-based business models, trade or government/industry engagement, and multi-market partner ecosystems (India plus US/UK/EU/SEA) will be highly valued.

What You'll Do

You'll own the business strategy and growth agenda for the Cross-Border & Export category on the ONDC Network. You'll drive onboarding, activation, and scaled adoption of exporter, seller, and logistics/3PL participants, define category-specific go-to-market strategy, and build the international supply chain backbone — customs, freight, and trade compliance — that underpins performance. Working closely with Product, Technology, Policy, and Operations teams, you'll remove adoption barriers, champion a frictionless merchant and customer journey, track category health, and represent ONDC with trade, industry, and government stakeholders while mentoring a category execution team.

Why ONDC?

Lead one of India's most transformative Digital Public Infrastructure initiatives and shape the future of open, cross-border digital commerce. Build the export and logistics partner ecosystem that connects Indian sellers to global markets, collaborate with industry leaders and policymakers, and help redefine how cross-border trade operates at population scale.

Location: ONDC Headquarters, South Delhi (Work From Office)
